

Shape Collage

Draw each of these shapes (oval, star, circle, square, heart) out on a sheet of white paper using a black marker; make the shape as large as the paper (each shape gets their own individual sheet). Cut each of these small shapes out and have child help you glue these small shapes onto the matching larger shapes drawn. This activity is for making a shape collage of all of the shapes to teach your child. As they are gluing the smaller shapes to the large matching shapes on the paper, have child say each shapes name to you; or you teach child.
