

Counting Snowflakes

Ages 1 year—2 years

Objective: The child will build early math skills by counting #1-5 & associating visual representations.

Materials needed:

Counting Snowflakes (printable) *Only #1-5

Scissors

Tape

Procedures

1. Before hand, cut up the snowflake pictures individually to show and count.
2. Sit with your child on the floor for this activity next to a low window or mirror.
3. One at a time, you are going to tape up the snowflake on the window or mirror and say that number to your child.
4. After they are all taped up (1-5) and your child can see them, re-count them while pointing to each again. Ask child: "Can you count with me?"
5. Encourage your child to try and pull the snowflake pictures down one at a time. Re-count them as they do so. Ask child to try and count again with you.

Counting Snowflakes

Ages 1 year—2 years

Milestones to meet:

The child builds early math skills by counting #1-5. The child can use fine-motor skills and hand-eye coordination to pull pictures down off of the window or mirror.

Evaluation:

Did this lesson work for your child? Why or why not?
