

Animals Around the World Ages 2 years—3 years

Objective: The child visualizes different kinds of animals they may see and learns their names.

Materials needed:

[Kids National Geographic Online](#)

Procedures:

1. Have your child sit in your lap looking at the computer screen for this activity today.
2. Go through National Geographic Animals online and view different kinds of animals. Teach your child their names, characteristics, habitats, and breeds (such as mammal, reptiles, and insects).
3. This activity builds awareness in animals, language capacity, and new knowledge of specific concepts in your child.
4. Continue teaching and learning with your child using NatGeoKids website until your

child no longer shows any interest.

Milestones to meet:

The child can listen and look at animals in pictures. The child recognizes animals and can tell you the names of those. The child learns about animal characteristics.

Evaluation:

Did this lesson work for your child? Why or why not?
