

# Counting Numbers 1 Years to 2 Years

**Objective:** The child is introduced to numbers 1 through 5 and begins to count.

## **Materials needed:**

Numbers 1-5 Sheet (printable)

## **Procedures:**

1. Optional before hand, you can cut out the numbers and circles, and tape low to a wall or window for teaching purposes to show child. View picture on next page as an example.
2. While pointing to each number, say them to your child.
3. Now count the circles and point to them.
4. Ask them to point with you, or hold your child's hand and have them "point" to each circle while you count them. Ask them to "count with you."

# Counting Numbers 1-5

## 1 Year to 2 Years

5. Remember to keep it simple. Only count from 1 to 5. Point to each object/item as you count to help teach your child one-to-one correspondence. See if they mimic you by pointing and counting.
6. Objects around the house can be, counting the windows in one room, counting televisions you may have in the house, or use food items such as crackers or animal cookies to count.

### **Milestones to meet:**

The child can repeat-count from 1 to 5. The child can point to objects when counting to associate its correspondence.

### **Evaluation:**

Did this lesson work for your child? Why or why not?
