## **DEVELOPMENTAL STAGES OF MOTOR SKILLS**

INFANT	Move arms and legs, or put hands together
0-6 MONTHS	Control of both arms will be the same
	Bats at objects or Kicks at objects in front of them
	Move eyes and hand to coordinate from side to side
	Puts objects and/or hands in mouth
	Grasps objects and holds in closed fist
	Holds up own head
	Begins sitting up on own
	Begins rolling and turning (some may start scooting)
	Watches objects and reacts to stimuli
INFANT	Motions become stronger
	Picks up objects and sets them down
6-12 MONTHS	Picks up objects and sets them down 1 year-Begins to have a pincher grasp (two-fingers)
	1 year-Begins to have a pincher grasp (two-fingers)
	1 year-Begins to have a pincher grasp (two-fingers) Grabs and lets go of objects with purpose
	1 year-Begins to have a pincher grasp (two-fingers) Grabs and lets go of objects with purpose Crawls and Scoots
	1 year-Begins to have a pincher grasp (two-fingers) Grabs and lets go of objects with purpose Crawls and Scoots Pulls up to a stand Tries to stand on own (some 1 year olds may be be-
	1 year-Begins to have a pincher grasp (two-fingers) Grabs and lets go of objects with purpose Crawls and Scoots Pulls up to a stand Tries to stand on own (some 1 year olds may be be- ginning to walk)
	1 year-Begins to have a pincher grasp (two-fingers) Grabs and lets go of objects with purpose Crawls and Scoots Pulls up to a stand Tries to stand on own (some 1 year olds may be be- ginning to walk) Sits up on own
	1 year-Begins to have a pincher grasp (two-fingers) Grabs and lets go of objects with purpose Crawls and Scoots Pulls up to a stand Tries to stand on own (some 1 year olds may be be- ginning to walk) Sits up on own Toss and kicks objects

## **DEVELOPMENTAL STAGES OF MOTOR SKILLS**

TODDLER	Stands and/or Walks on own; Begins to run
	Sit to Stand, Stand to Sit positions
1-2 YEARS	Jumps on two feet
	Throws, rolls, and catches a ball
	Kicks a ball
	Balance will strengthen
	Begins moving fingers independently of other fingers
	Uses hand gestures for wants and needs (Points)
	Uses whole-arm movements to grasp and color
	Mimics dancing
	Uses two-finger grasp to pick up objects
	Begins push and pull
TODDLER	Uses more elbow movement when using hands
	Begins opening and closing objects, pulling and
2-3 YEARS	pushing, pinching, peeling and sticking on stickers, squeezing, clipping, transferring, and tearing objects
	Color progresses from circular scribbling to up/down and side/side scribbling
	Alternate right and left hands to manipulate objects
	When holding pencil, fingers point towards paper
	Begins using scissors with a whole-hand grasp, using both hands to open and close scissors; At 3 they can hold scissors in one hand and snip at paper
	Can run, jump, kick, catch, throw, and dribble a ball

## **DEVELOPMENTAL STAGES OF MOTOR SKILLS**

PRESCHOOL	Uses a pincher grasp to hold pencil and uses wrists
	Hand preference begins to show (left or right)
3-4 YEARS	Can stay in line while coloring, trace along lines, and cut along lines using one hand to hold scissors
	Can write their own name (or some letters in it)
	Skips and Hops; Throws, catches, and bats at balls
	Can stand on one foot; can hop on one foot
	Can squeeze out own glue (estimation of amount is still underdeveloped of "perceptive necessity"
	Can tear, rip, link, construct, clip, lace, bead, zip, and button objects
	Can tear and stick tape to paper (or stickers)
	Can transfer and distribute objects to sort or match
PRE-KINDER	Holds a pencil with two-finger grasp
	Stays in lines when coloring
4-5 YEARS	Cuts out definite shapes or patterns with diverse lines (diagonals, circles, loops, sides)
	Glues on own with accurate perceptive amount
	Dribbles and bounces a ball
	Uses their body in "sport-like" ways with purpose
	Can run backwards and do jumping-jacks
	Can write their own name (left to right)
	Both hands work together in balance
	Holds scissors with one hand, two-finger and one- thumb mature fashion
